

Alec Nacamuli

Alec Nacamuli is an Executive in IBM's Global Transaction Management team. This unit focuses on payment and market infrastructure systems, B2B e-commerce, corporate payment and cash management offerings, retail and wholesale payment applications, back-office processes and architectures and the implementation of new industry infrastructures.

Alec is also the Editor of the Journal of Payments Strategy and Systems and the co-author of the book "Payment Systems – from the salt mines to the Board room" (Palgrave Macmillan 2008, ISBN 978-0-230-20250-4).

He previously worked as an independent consultant advising leading institutions and the European Commission on the implications of the single currency for banks and payment systems.

Alec was formerly Executive Vice President at S.W.I.F.T., which he joined at its inception, with responsibility for strategy, product management, and sales. Specifically, he headed S.W.I.F.T.'s expansion towards value-added services such as the EBA Netting and FX confirmation matching, and the opening towards stockbrokers, fund managers, and the securities markets.

He was previously employed by ICL and Logica.

Alec holds an Electrical Engineering degree from the Eidgenoessische Technische Hochschule in Zurich, and an MSc in Computer Science from London University. He also attended the Executive Programme at the Stanford Business School.
