

Diana Huber

Since October 2007 Diana Huber is an expert in the field of operational and other risks in the German Savings Banks and Giro Association (Deutscher Sparkassen- und Giroverband). Via 11 Regional Associations, she supports 431 Savings Banks and 7 Federal states' banks as well as other companies, associated with the German Savings Banks and Giro Association.

The management of datapools containing operational risk scenarios and loss events collected from the member institutions is a main focus of her work.

Except of her duties connected to the operational risk management, Ms. Huber participates in interdisciplinary projects, lastly in the project for Solvability and MaRisk Implementation Support in the group of savings banks, Federal states' banks and associated companies.

From the beginning, the operational risk subject always was a part of Ms. Hubers career, both in the controlling department of a south-german savings bank, where she implemented the operational risk management, and later, in the same savings bank, as a business assistant of the Board of directors.

Ms. Huber graduated from the Baden-Wuerttemberg Cooperative State University (formerly University of Cooperative Education) in Villingen-Schwenningen (Germany) with Bachelor of Arts in Business Administration (Diplom-Betriebswirtin (BA)).
