

Albert Fekete

Is the CEO of TRASSET International S.P.A., an Italian company providing worldwide banking solutions specialized in the area of Treasury, Investment and Corporate banking domains. His goal is to make the company the most trusted and respected financial solution provider in the Globe. He started his professional career in 1988 after passing out from Technical University of Cluj with a degree in Electronics and Telecommunications Engineering specialized in Computer Technologies. He started his career with Hungarian Telecom where he had been the project director who successfully implemented country wide integrated operational support systems along with Deutsche Telecom and Ameritech. Accumulating the project management and software development experience he switched to banking sector, studying the commercial and investment banking at International Training Centre for Bankers – Budapest and cumulating significant experience during the more than 50 projects at client side.

In 1997, Albert Fekete formed his first software development and implementation services company, developed Treasury, Asset management and Corporate banking systems with the principle to automate in maximal measure the workflows within the banks and building highly parameterizable systems.

In 2008, Albert Fekete established the headquarters of whole Trasset group in Milano, the company - called TRASSET International S.P.A. – with the vision to be one of the Italian companies with strong market penetration worldwide.

Today, Trasset has more than 50 customers worldwide with products running in over 100+ Sites in 20 Countries. As a first step towards the goal of Global expansion Albert created new offices in Saudi Arabia, Malaysia, U.S.A., Mexico, Serbia and Romania.

In 2006 Trasset has got the chance to implement the Islamic banking functionalities in Treasury, Asset management, Corporate Banking and Trade Finance areas for the world's largest Islamic bank: Al Rajhi Bank, Saudi Arabia, world's leading Islamic Bank and Trasset was awarded the contract based on the company, product and execution capability evaluation. Now multi-entity version of the Trasset system is working in Riyadh base server in Saudi Arabia, Kuwait, Malaysia and Jordan is under implementation.

It is a real success story and Trasset in 2009 has got the nomination of "Strategic partner" of the bank.

Having the chance to work together with the experts of Al Rajhi Bank the Trasset system became one of the most complex pure Islamic banking systems worldwide, practically having all the fully Shariah compliant Islamic banking built in one integrated system with the standard conventional banking.
